

(a) where the partition comes from

I2V

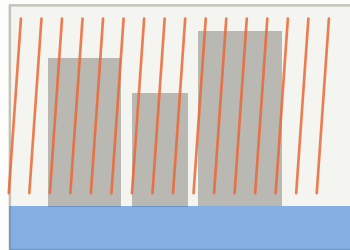

T2V

annotator never sees a later frame
layout-dependent, but FAILURE-independent:
long-horizon drift cannot contaminate the mask

(b) three labels, not two

rain crosses
static support:
the same pixels
are BOTH

Ω_{overlay} **is excluded**
from headline
fBD and NBF

- Ω_{static} support
- Ω_{flow} intended motion
- Ω_{overlay} transits both
